Healthcare Organizations

Identify with IdentiSys™

From start to finish...IdentiSys has you covered with complete identification solutions for patients, staff, visitors and volunteers. We can help you more cost effectively manage your patients and staff, drive patient loyalty, reduce operating costs and increase patient, staff and visitor safety. And, IdentiSys service personnel are industry veterans - we offer a wide range of support plans to ensure you stay up and running.

Automated Registration
Speed up your registration, reduce costly duplicate medical records, and increase patient privacy and satisfaction. Simply scan a driver’s license or other ID and populate fields in your HIS system.

Positive Patient ID
–Wristbands/Labels
Save cost and eliminate waste by printing wristbands and the exact number of labels you need. IdentiSys offers a variety of printers (thermal or laser) that can translate, filter and format data to produce the exact look you want on wristbands or labels of any size. Our wristbands are specifically designed for the healthcare market to meet your needs for a variety of applications and can incorporate alert indicators.

– Embossers/Imprinters
Still one of the most traditional ways to identify patients in hospitals—an embossed plastic card and imprinters to transfer information onto your forms. This is simple card issuance and duplication of information onto pre-printed forms.

Staff, Visitor, Volunteer & Vendor ID
Staff ID cards are essential to your facilities’ security. Increase visibility by requiring staff, visitors, volunteers and vendors to wear ID cards. IdentiSys systems easily connect to your Human Resources database or directory to ease IT concerns. Accessories – lanyards, badge holders and badge reels can also aid in identifying people throughout your facility while promoting your brand.

Visitor Management
IdentiSys visitor management systems can register (or pre-register) and badge visitors in seconds. Increase security, check watch lists, track activity at entrances and exits, and generate reports. Interested in self-registration? We offer a kiosk solution for busy healthcare facilities.
