

Asset Track

Innovative Asset Management Software

Asset Track is an innovative, new tracking system from Jolly that allows organizations to manage and track all of their assets by scanning asset barcodes or by entering physical characteristics. The open data architecture allows Asset Track to integrate with existing information systems. Features

including centralized management, a barcode label designer and comprehensive audit trail reporting are built-in. Asset Track integrates with Active Directory, ID Flow, Lobby Track and other existing ID card systems to make borrower check out quick and easy.

Check Assets In & Out

- Check out and assign assets to individuals
- Design and produce professional asset barcode labels
- Scan ID cards and asset barcode labels for fast check out
- Look-up users using LDAP / Active Directory
- View each asset's usage history
- Set asset due dates and loan periods
- Import new assets from a spreadsheet or list
- Maintain connections to multiple databases in real-time
- Use pre-designed record forms or easily create your own
- Integrate with ID Flow or Lobby Track
- Integrate with your existing information system
- Ability to calculate depreciation

The Asset Track Advantage

Asset Management

Easily track all assets in your facilities with Asset Track. Record supplier and user information. Know where the asset is located. Scan manufacturer barcodes or produce barcode labels directly from Asset Track. Check assets out to people in your Active Directory or HR system.

Tool and Equipment Management

Loan tools and equipment to qualified users. Keep maintenance records, product manuals and re-order information at your fingertips. View detailed usage and maintenance logs for each tool. Use Asset Track to allocate equipment costs according to usage.

Hardware and Software Management

Track software license usage and distribution. Record computer warranty and maintenance agreements. Keep updated technical support numbers, contract expiration dates and links to documentation. Print stickers with network, MAC and license information.

Document Tracking

Check important documents in and out and track who has them. Asset Track a flexible library management system. Create ISBN and other barcode labels.

Vehicle Tracking

Maintain detailed vehicle use and maintenance records. Record who has each vehicle, mileage, license plate number, VIN number and DMV renewal information.

Inventory Management

Manage supply and inventory levels and receive alerts when supplies levels are running low. Scan an item's UPC barcode and allocate its consumption to a user or department. Keep re-order information at your fingertips.

Compatible with all Windows
compatible barcode scanners

Languages

Available in 11 languages

System Integration

Compatible with Lobby Track
Compatible with ID Flow
Compatible with open HR systems
Compatible with open inventory systems

System Requirements

Microsoft Windows
XP/2003/Vista/2008/Win7
Pentium 4 1.8 Ghz
1 GB RAM
100 MB Free Disk Space

Available in Several Editions

- Standard
- Premier
- Scan Station
- Report Station

Feature Highlights

- Customize asset record forms - create your own or select from one of the included forms
- Store critical information such as warranty, serial number, license key, user manual, support telephone number and supplier
- Track inventory levels of commonly used goods and supplies
- Receive re-order notifications when inventory runs low
- Allocate supplies and equipment to users and departments
- Check out an asset by scanning it's barcode label or entering asset information
- Lookup up user in LDAP / Active Directory or HR database during check out
- Check out assets to a borrower by scanning their ID card
- Configure check out permission rules
- Configure on-screen messages and notifications
- Send e-mail notifications when assets are checked in or out
- Combine assets into functional groups
- Link and manage multiple locations and check out stations
- Link to any asset database, file-based, server-based, LAN / WAN or ODBC / OLE DB in real-time
- Easily search for specific asset information from thousands of records using powerful and flexible search tools
- Design asset barcode labels using the integrated label designer
- Use the step-by-step wizard to easily add new assets to the system and automatically print a barcode label
- Capture and edit photos of assets using a TWAIN / WIA compatible digital camera or webcam
- Print and export detailed logs and reports
- Visualize usage patterns with customizable charts and graphs
- Customize logs and reports - use any combination of fields and criteria to produce professional reports
- Depreciation methods now included
