

Shelter Registration Solutions

Mobile Solutions®

Mobile Solutions® provides an automated identification and registration solution which is perfect for swift, on-site shelter registration. Identify shelter attendees as they stand in line ready to be served. Issue wristbands with a QR barcode tied to their identification. Recipients are quickly registered by scanning their wristband when they arrive at the registration station.

IDENTIFY

- > Identify recipients as they wait in line at shelter locations by scanning their driver's license.
- > Perform a more comprehensive registration using Mobile Solutions tracking software.
- > Identify & label recipients in route to shelter locations.

ISSUE

- > Print identification wristbands instantly on-site using a handheld printer.
- > Issue preprinted wristbands used to assign to recipients.
- > Perform automated or manual registration on-site.

TRACK

- > Scan a QR barcode recipient's ID wristband to register recipients into the shelter event and track their attendance.
- > Track staff and volunteer shelter work hours.

Mobile Solutions® Products

Mobile ID 1.0

Quickly check-in recipients by scanning their driver's license, and print ID wristbands in seconds, and easily access personnel data including emergency contact information.

Mobile ID Spot

Mobile ID Spot reduces long wait lines by identifying recipients and issuing printed labels or wristbands quickly on-site before enrolling them within seconds by scanning their printed QR tag ID at registration.

Emergency Event Manager

Emergency Event Manager Software (EEMS) is an accountability solution that enables organizations to track attendees and manage an emergency incident scene on-site electronically, using an automated process that captures and manages event activity data.
