

intimus PacMaster S Packaging Material Shredder

Any organisation that sends or receives packages is likely to be inundated with corrugated cardboard boxes. This packaging material is convenient and sturdy – but what happens after it reaches the end of its useful life?

The intimus® packaging material shredders provide for a unique type of corrugated recycling: they transform used corrugated cartons into valuable padding material and packaging filler. The resulting stuffing materials ensure reliable protection during shipping – even for sensitive and heavy goods. These practical filler material shredders pay for themselves quickly at any organisation that receives and ships packages on a regular basis.

- Shreds old and obsolete cardboard to robust packaging material
- Well designed controls: lockable power switch is also an emergency stop switch
- Single pass operation
- Lockable master switch
- Size guide on the work surface to ensure accurate cutting of the cardboard to customise the stuffing mats to required format
- Extremely robust steel plate housing for heavy duty use at the packing station

Model	Pad grid	Shredding capacity		Cutter feed width	Cutter feed height	Cutting speed
